

# Directions to Tack Up Your Horse

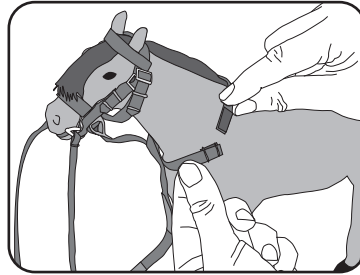

**1** Open your horse or pony's mouth with your fingers and slip the bit inside. Your horse's nose should go through the noseband.

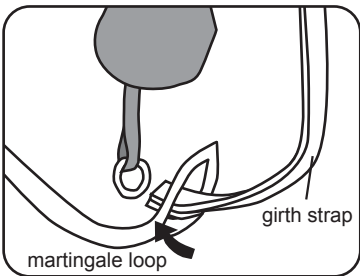

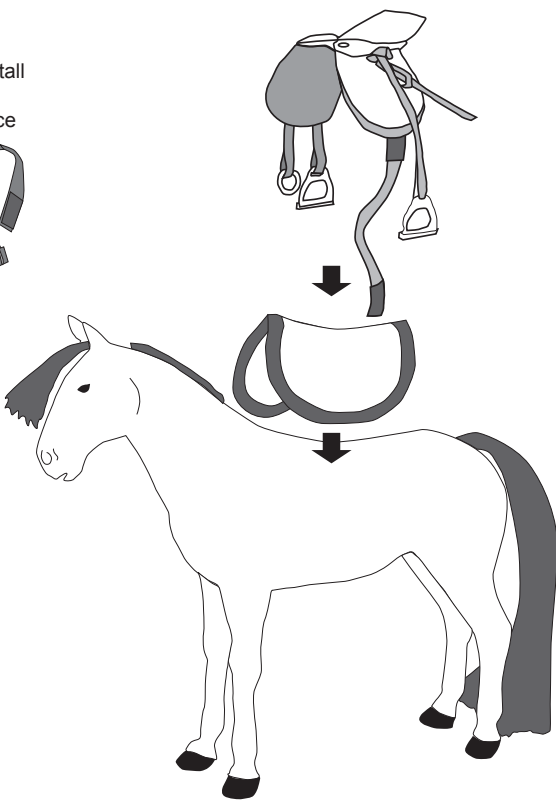

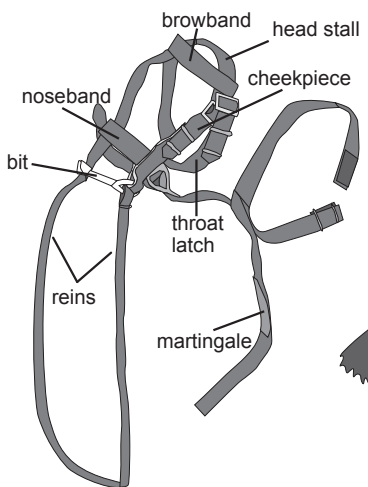

**2** Slip your horse or pony's ears between the head stall and the brow band.

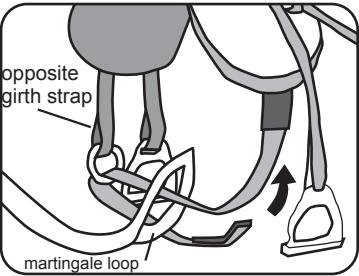

**3** Fit the cheek piece by attaching the two velcro ends together. Repeat for the throat latch.

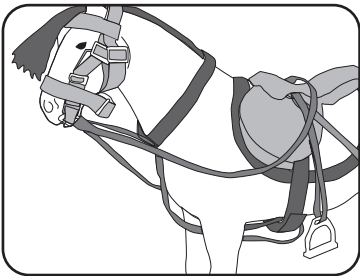

**4** Attach the neck strap of the martingale by attaching the two pieces of velcro.

**5** Attach the two velcro pieces on the martingale to create a loop. Slide the girth through the martingale loop.

**6** Slide the girth through the metal ring on the opposite girth strap. Tighten the girth and secure the velcro pieces.

**7** This is how the tack should look.
